EXPERIENCE

Web & Marketing Designer | Town Web | 2024 - Present

Wisconsin, USA

- Lead web design across 20+ client projects, translating business goals and complex requirements into responsive websites from information architecture and wireframes through final UI and developer handoff.
- Design accessible, information-rich websites for municipalities and public-sector organizations, balancing usability, visual identity, responsive behavior, and diverse audience needs.
- Collaborate with developers, project managers, content, marketing, and client-facing teams through discovery, design review, implementation, accessibility-focused design, and QA.
- Support company marketing and digital initiatives alongside client web work, using AI-assisted workflows to prototype, build, and maintain websites more efficiently.

UX/UI Designer | 8com Limited | 2023

Maidenhead, UK

- Designed responsive websites, mobile apps, and dashboards for an agency serving clients across multiple industries.
- Translated varied client requirements into user flows, wireframes, responsive interfaces, and polished visual systems while adapting to different brands, audiences, and product types.

Freelance Web & UI Designer | Upwork & Direct Clients | 2021 - Present

International | Remote

- Delivered 10+ projects for clients across different countries and industries, starting with freelance graphic design in university and expanding into web and UI/UX design.
- Own projects from early requirements through site structure, wireframes, visual direction, responsive UI, and implementation, tailoring each experience to the business and its audience.
- Designed multilingual LTR/RTL websites, booking flows, travel-program experiences, service-business websites, and other digital interfaces; build and maintain selected websites in Framer.
